

SARAH CONNOR  
sarah.connor@email.com

## SUMMARY

A veteran architect specializing in building highly scalable infrastructure using modern cloud computing paradigms. Possesses 7+ years of experience transforming monolithic enterprise systems into resilient, distributed application architectures.

## TECHNICAL SKILLS

- \* Languages: Golang (Go), Python, JavaScript, Shell Scripting.
- \* Infrastructure: Implemented Infrastructure as Code (IaC) solutions for automated cloud provisioning. Proficient in managing container orchestration platforms and ensuring continuous delivery workflows.
- \* Cloud Experience: Deep expertise in the world's leading public cloud platform's compute, storage, and networking components. Successfully migrated several legacy applications to Function-as-a-Service (FaaS) environments.

## PROFESSIONAL EXPERIENCE

Senior Systems Architect (2018 - Present)

- \* Directed the complete transition to distributed application architecture.
- \* Maintained deployment workflows using automated testing and version control.
